Projects**

Overview

# 01

# Project Execution through Flexible Provision of Expertes

## The Challenge:

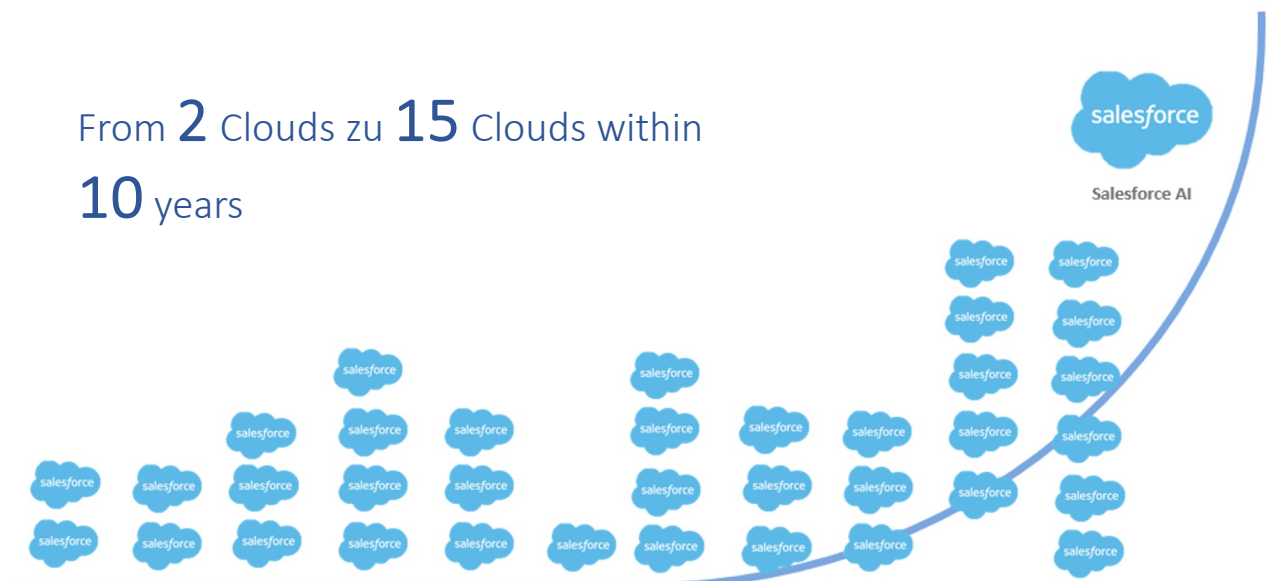

Increasing technological complexity makes it difficult to find suitable specialists

## The Solution = the NUNC Co.Experts Network

A network consisting of hand-picked experts, supplemented by the NUNC team with many years of project experience.

This white paper describes the innovative approach of an operational framework that combines many benefits for both our customers and members.

NUNC Consulting for your Project Success

# Project management, consulting, engineering and development - competent, reliable and flexible

# 02

## What we offer:

- A network of selected and highly motivated experts with proven experience and extensive domain knowledge.
- Central organization via a contact person for the network of experts, including quality management, commissioning and execution
- Flexible working models:
  - **Individual experts** to complement your project team or to solve a specific requirement.
  - **A team of experts** to implement a complete product backlog including project management, solution design and development.

The right expertise at the right time for  
your project success.

A “blended workforce“ as a service

NUNC Co.Experts Network

# A network of experts for your project success

03

## The origin/The idea

Germany boasts a significant and growing number of self-employed tech professionals, a trend fueled by the evolving work landscape.

Through our extensive project experience, we've observed that these highly skilled individuals are often overlooked by traditional partners and recruitment agencies.

To bridge this gap and empower collaboration, we created the Co.Experten program, a dedicated platform for these experts to connect and work with us.

## The Co.Experts Program

The program fosters communication and collaboration among our network. This unites the collective knowledge of select project managers, architects, and developers into a central hub.

NUNC Consulting stewards this program, coordinating expertise.

Our in-depth knowledge of skills and availabilities ensures we connect clients with the perfect expert at the precise moment.

This program cultivates a network of motivated experts, proven by their competence and extensive project experience, capable of tackling virtually any challenge. Guided by mutually agreed-upon ethical principles and quality standards, we champion shared interests and establish a flexible, efficient working model.

A „blended Workforce“ as Service

# Thank you!
